

1791077CK : PM1300 Dust Collector 1.75HP 1PH, Can.

The PM1300 Dust Collector has dual 4" dust ports (or one 6"). The canister filter offers superior filtering surface area over standard bags, and captures 98% of 2-micron particles. A digital timer can be set for up to 99 minutes, and an infrared sensor allows remote control operation. The all-metal duct improves air flow and rigidity. The clear collector bags are large capacity, which means less down-time changing them. Four swivel casters and conveniently located handles allow for easy mobility.

Features and Benefits

- Remote-controlled digital timer can be programmed for up to 99 minutes
- Canister filter offers over six times filtering surface area of standard bags
- All-metal duct construction for rigidity and improved air flow
- 1-3/4HP motor offers plenty of power for effective air movement
- Dual 4" dust ports for simultaneous collection from two machines
